Product Stewardship Information Sheet

Advanced Polypropylene Homopolymer PP H118 (1100L)

Product Manufacturer:

This product is manufactured by Advanced Petrochemical Company ('Advanced'), KSA.

Regulation (EU) No. 10/2011: Food Contact Applications

Polypropylene Homopolymer manufactured by 'Advanced' complies with Regulation (EU) No. 10/2011 (including its amendments as of date) for food contact applications.

The product also complies with Regulation 1935/2004/EC, Restriction of use of certain epoxy derivatives 1895/2005/EC, Absence of Allergens (Regulation 1169/2011) and Absence of GMO, absence of recycled materials as per definition of Regulation 282/2008/EC.

The product also complies with Regulation 2023/2006/EC (GMP) and to the compliance 'Advanced' has standards in place such as ISO 9001:2015 which regulates production and production related activities.

The product complies with relevant requirements of Regulation EU 10/2011 (PIM) and its subsequent amendments, applicable to intermediate materials (i.e., plastic powders, plastic granules or plastic flakes)
The monomer and additives used to produce the resin are also listed in EU Regulation No. 10/2011 and subsequent amendments.

EU Regulation 10/2011/EC specifies 10 mg/dm^2 as the maximum overall migration (OML) from the finished plastic food contact material or article. The OML and SMLs (when applicable) should be determined according to the requirements specified in EU Regulation 10/2011/EC and subsequent amendments. The OML and SML determinations are the responsibility of the manufacturer of the finished plastic food contact material or article. In addition, we remind you that the manufacturers of the finished food contact material or article must verify that the finished material or article, manufactured according to good manufacturing practices, does not modify the organoleptic properties of the food.

Dual Use Additives

Substances authorized as direct food additives ("Dual use additives") are used for the manufacturing of this product.

- E470a Calcium salts of fatty acids

Specific Migration Limit (SML) & Overall Migration Limit (OML)

This product does not contain substances that are regulated with either Specific Migration Limit (SML) and/ or Total Specific Migration Limit (SML(T)) and/or QM (residual quantity) and/or a QMA (residual content per food contact surface area) as defined in Tables 1-3 of Annex I of EC 10/2011 and subsequent amendments.

This product may contain minor trace levels of other metals, which are regulated with a specific migration limit in EU (Commission Regulation 10/2011 as amended; Annex II). These metals are not intentionally added but may be present as impurity of the raw materials used. Migration tests on representative polyolefin samples showed a migration level below the SMLs, thus exceeding these SMLs under foreseeable conditions of use involving food contact is not reasonably expected.

SML = 1 mg/kg (expressed as Aluminum)

EU Regulation 10/ 2011 which applies to all EU Member States, specify 10 mg/dm^2 as the maximum overall migration from finished plastic food contact articles. OML and SML determinations are the responsibility of the manufacturer of finished plastic food contact material or article.

In accordance with EU Regulation No. 10/ 2011, the migration should be measured using the actual foodstuff or the appropriate food stimulants at the real time/temperature conditions of use, according to the rules specified in EU Directives 97/48/EC (amending 82/711/EC) and 85/572/EC.

We remind you that the users must verify that the finished items, manufactured according to good manufacturing practice, must not modify the organoleptic properties of the food.

Annex IV, Part 6 – Genotoxicity

In accordance with the requirements of Regulation 10/2011/EC (PIM), Annex IV, part 6, this product does not contain genotoxic substances which would migrate from a final material at a level exceeding 0.15 ppb in food or food simulant.

RoHS Directives 2002/95/EC & 2011/65/EU and Commission Delegated Directive (EU) 2015/863 and relative restrictions

RoHS Regulation refers to electrical and electronic equipment and not specifically to plastic raw materials. However, based on the available documentation from raw materials suppliers, this product complies with the requirements of the Directives 2002/95/EC, 2011/65/EU (RoHS 2) and 2015/863/EU (RoHS 3) amending Annex II to Directive 2011/65/EU in the manufacturing of this product neither of the following subsatnces have been used: cadmium, lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE), bis(2-ethylhexyl)phthalate (DEHP), butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP) and diisobutyl phthalate (DIBP).

Waste Electrical and Electronic Equipment (WEEE) – Directive 2012/19/EU – Annex VII

The chemical substances (PCB, PCT, Hg, asbestos, CFC, HCFC, HFC, ceramic fibers, brominated flame retardants) requiring selective waste treatment are not used in the manufacture or formulation of this product. However, the product has not been tested for these chemical substances.

Product Metal Content

Directive 94/62/EC: Packaging and packing waste

Based on the available documentation from raw materials suppliers, this product complies with above referred Directive 94/62/EC and its amendments in force. Cadmium, chromium (VI), lead and mercury are not used in the manufacture of or the formulation of the product. The product meets the year 2001 requirements of less than 100 ppm for total incidental cadmium, chromium (VI), lead and mercury. In addition, the product has the potential to be recycled according to these requirements.

US Coalition of Northeastern Governors (CONEG)

Based on the available documentation provided by our raw material suppliers, this product complies with the CONEG Model Legislation for requirements regarding the defined limit for the sum of heavy metals (lead, mercury, cadmium and hexavalent chromium), of less than 100 ppm for total incidental presence.

End of Life Vehicle

To the best of our knowledge, based on the available documentation from raw materials suppliers, we deem that this product complies with the directive 2000/53/EC and its following amendments as concerns the defined limit(s) of heavy metals.

Heavy Metals Testing

Testing of resins similar to this product has shown the following metals are not present at the sensitivities listed in parenthesis: antimony(3 ppm), arsenic(2 ppm), barium(2 ppm), cadmium(1 ppm), chromium(1 ppm), lead(2 ppm), mercury(0.01 ppm), selenium(3 ppm), silver(1 ppm).

Other substances and chemicals

Nanomaterials

Nanomaterials (defined as a natural, incidental or manufactured material, containing particles, in an unbound state or as an aggregate or as an agglomerate and where, for 50 % or more of the particles in the number size distribution, one or more external dimensions is in the size range 1 nm - 100 nm.) are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

REACH Compliance & Substances of Very High Concern (SVHC)

The product complies with REACH requirements. The substances, which are contained in the product, and require registration, also complies with REACH requirements, Substances of Very High Concern (SVHC) updated as of date, Substances listed in Annex XVII to REACH ("Restriction List") and includes all the restrictions adopted in the framework of REACH & the previous legislation, Directive 76/769/EEC and Substances included in Annex XIV of REACH ("Authorization List").

The current list of all SVHCs can be found at ECHA website: https://echa.europa.eu/candidate-list-table

The product does not contain any candidate listed substance above > 0.1 wt%. threshold as stated in REACH (Article 57, Regulation No. 1907/2006) determined either through (i) non-use of the substance, (ii) mass balance calculation, or (iii) specific testing. The substances of very high concern (SVHC) are not added intentionally during manufacturing process of this product.

Also, to the best of our knowledge, none of these materials are generated during production of this product. Because we do not expect these materials to be present, we do not run any analysis on our raw materials or our finished products to measure for these materials.

Active and Intelligent Materials

The product does not contain any substance or ingredient registered and authorized under Regulation (EC) No 450/2009 of 29 May 2009 on active and intelligent materials and articles intended to come into contact with food Regulation (EC) No. 450/2009 on active and intelligent materials and articles is not applicable to this polymer resin.

National legislation in EU – Member states

Italy

This product complies with D.P.R: 777/82 and amendments, and D.M. 21 Marzo 1973 MOCA IT | Consolidato 2023 "Disciplina igienica degli imballaggi, recipienti, utensili, destinati a venire in contatto con le sostanze alimentari o con sostanze d'uso personale", which takes into account the amendments from 1973 to 2023.

France

This product complies with "Décret No. 2007-766 du 10 Mai 2007 portant application du code de la consommation en ce qui concerne les matériaux et les objets destinés à entrer encontact avec les denrées alimentaires", as amended and the French DGCCRFguidelines on food contact plastics.

Germany

This product complies with "BfR-Empfehlung VII Polypropylen, Stand 01.06.2019"

The Netherlands

This product complies with "Verpakkingen- en Gebruiksartikelenbesluit, 2014 (Warenwet), Deel A, Hoofdstuk 1, Kunststoffen", as amended on 01-07-2022

National legislation in Non-EC Countries

Switzerland

The product complies with Swiss Ordinance No. SR 817.023.2: Verordnung des EDI über Bedarfsgegenstände vom 16.12.2016 (817.023.21) ; Stand 01.02.2024, 5. Abschnitt: Bedarfsgegenstände aus Kunststoff

Turkiye

This product complies with Turkiye Codex Food Substance and Materials,, Communique No. 2019/44 issued on December 25, 2019 and subsequent amendments.

United Kingdom

This product complies with The Materials and Articles in Contact with Food (EU Exit) regulation, amended by SI 2019 No. 704 - (ENG); SI 2018 No. 186 - (NIR); SI 2019 No. 32 - (SCO); SI 2018 No. 913 - (WAL)

www.advancedpetrochem.com

Norway
This product complies with Sosial- og helsedepartementets forskrift 1993-12-21-1381 - as amended (referring to Regulation EU No. 10/2011)

FDA
The product complies with Food and Drug Administration (FDA), Regulation 21 CFR 177.1520(a)(1)(i) and (c)1.1a, Olefin Polymers. All ingredients used in the product meet the requirements of their respective FDA regulations and 21 CFR 177.1520 (b).

The product is considered as suitable for use in articles that contact food, including cooking, under conditions of use listed under 21 CFR 176.170©, Table 2, A through H, and can be used in contact with all types of food as listed in 21 CFR 176.170(c), Tab.1.

China
The product complies with following Food Contact Standards:

- GB9693-1988 Standard (GMP std FCM)
- GB9693-1988 “Hygienic standard for polypropylene resin used as food packaging material”:
- GB4806.1-2016 “Food Contact Material & Articles General Safety Requirement”.
- GB4806.6-2016 “National Food Safety Standard: Food Contact Resins”. Appendix A.1, Serial Number 74, resin type: PP.
- GB4806.7-2023 “National Food Safety Standard – Food Contact Plastic Material and Product”.
- GB9685-2016 “National Food Safety Standard – Additives for use in Food Contact Materials and Articles”. The additives used in the product comply with the requirement of "GB9685-2016 National Food Safety Standard: Additives for use in Food Contact Materials and Articles” and relevant approval announcements.
- GB31603-2015 “National Food Safety Standard -- General Health Code for Production of Food-contacted Materials and Products”.
- GB2760-2024 for dual use.

This product does not contain monomers and/or additives with SML and/or Overall Migration Limit (OML). However, OML and SML determinations are the responsibility of the manufacturer of finished plastic food contact material or article.

MERCOSUR (Argentina, Brazil, Uruguay, Paraguay, Venezuela and Bolivia)
This product meets the requirements of following regulations:

- GMC Resolution No. 03/1992 of April 1st 1992 and subsequent amendments, which establishes the general criteria and classification of materials for packaging and equipment in contact with food"
- GMC Resolution No. 02/2012 of April 19th 2012 which provides a "positive list of monomers, other starting substances and polymers authorized for the manufacture of plastic packaging and equipment that come into contact with food", as amended by GMC Resolution No. 19/2021.
- GMC Resolution No. 39/2019 listing additives allowed for plastics and polymeric coatings for use in food contact materials (FCMs).
- GMC Resolution No. 32/2007 - positive list of additives for plastic materials intended for the manufacture of food contact packaging and equipment.
- GMC Resolution No. 56/1992 and subsequent amendments, including GMC Resolution No 20/2021

This product does not contain monomers and/or additive with SML and/or Total Specific Migration Limit (SML (T)) and/or QMA (residual content per food contact area). In order to guarantee the compliance with the above Resolutions, the end plastic product must be analyzed by the manufacturer concerning total migration limit and such limit must be less than 50 mg/kg or 8 mg/dm².

ANVISA
The base polymer of this product is listed in Annex II – Positive List of Polymers and Resins for Plastic Packaging and Equipment in Contact with Foodstuff of Resolution No. 56/2012, as amended.by Resolution No.: 589/2021, which incorporates GMC Resolutions 19/2021, 20/2021, and 21/2021 into a single resolution.

This product contains only additives listed in Resolution RDC No.: 326, December 3, 2019.concerning additives.

Perù
This product(s) complies with relevant requirements according to NTP 399.163-1.2017: Plastic containers and accessories in contact with food, Chapter 1: General provisions and requirements.

Malaysia
Monomers and additives in this product are listed as authorized on Annex A and B, respectively, of Malaysian standard MS 2234:2009 on Plastics materials and articles intended to come into contact with food.

The Republic of India
This product is complying with Indian Standard IS 10910:1984 on “Specification for polypropylene and its copolymers for its safe use in contact with foodstuffs, pharmaceuticals and drinking water”.

This product comprises a basic resin that is listed in Indian Standard IS 16738:2018 (Positive List of Constituents of Polyethylene and Polypropylene in Contact with Foodstuffs, Pharmaceuticals and Drinking water), superseding IS 10141:2001 and IS 10909:2001.

The intentionally added additives and constituents used in this product are in compliance with IS16621:2017 (Positive List of Constituents of Polyethylene and Polypropylene in Contact with Foodstuffs, Pharmaceuticals and Drinking Water) and with IS16738:2018 (Positive List of Constituents for Polypropylene, Polyethylene, and their Copolymers for its Safe Use in Contact with Foodstuffs and Pharmaceuticals), superseding IS 10141:2001 and IS 10909:2001.

This product does not contain additives with a migration limit as mentioned in Table 1 of the Indian Food Safety and Standards (Packaging) Regulations 2018 of December 24, 2018.

Sri Lanka
Monomers and additives used to manufacture this product are complying with Food (Packaging Materials and Articles) Regulations -2010, which came into operation from July 1st , 2011, made by the Minister of Health in consultation with Food Advisory Committee in terms of section 32 of the Food Act, No. 26 of 1980 and subsequent amendments.

Middle East (GCC – Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and United Arab Emirates)

This product contains monomers and additives listed as authorized for materials in Table 1 of Gulf Technical Regulation GSO 1863:2021 (cancelling and replacing Gulf Technical Regulation GSO 1863:2013).

Gulf Technical Regulations GSO 2231:2012 (General Requirements For The Materials Intended To Come Into Contact With Food), GSO 839:2021 (Food Packages - Part 1: General Requirements) and GSO 1863:2021 (Food packages - Part 2: Plastic package - General Requirements) set general and technical performance requirements for final articles, which are intended for food contact. This material is a plastic intermediate material, not a final article. It is the responsibility of the producer of the final article to check if this material and final articles made out of it are suitable for the intended use and comply with all applicable regulations and requirements.

Taiwan:
This product is complying with Food and Drug Administration (TFDA), Act Governing Food Safety and Sanitation (updated June 2019) and Sanitation Standard for Food Utensils, Containers and Packages (updated August 2013).

Thailand
This product is complying with Notification of the Ministry of Public Health (No. 295) B.E. 2548 (2005) and Food Act, B.E.2522 (1979). The chemical substances in List #4 (Prohibitive Substances) of the Thailand Hazardous Substances Act B.E.2535 (1992) and Hazardous Substance Act (No.4) B.E. 2562 (2019) are not used in the manufacture of or formulation of this product. However, this product is not tested for these substances.

Japan
This product complies with Japan MHLW notification No. 196 from April 28, 2020 and subsequent amendments.

Declaration on California Proposition 65
The monomer and additives incorporated comply with California Proposition 65 and subsequent updates & amendments as of date and the substances listed in this proposition are not added directly or indirectly in this product.

Epoxy Derivatives – Regulation (EC) N.1895/2005
BADGE, NOGE and BFDGE are not used in the manufacture of or the formulation of this product according to requirement of Regulation N.1895/2005.

Regulation (EU) 2019/1021
POPs (Persistent Organic Pollutants) substances as defined in Regulation EU 2019/1021 are not intentionally added in the manufacture of this product.

Ozone Depleting Substances
Europe: Substances that deplete the ozone layer as defined in Regulation (EU) 2024/590 of the European Parliament and of the Council of 7 February 2024 and repealing Regulation (EC) No 1005/2009 (Text with EEA relevance) are not intentionally added in the manufacture of this product.

United States: Materials listed in the Clean Air Act Amendments of 1990 (Class I, CFC's and Class II, HCFC's, Halons and the solvents, carbon tetrachloride and 1,1,1-trichloroethane) are not intentionally used in the production of this product.

Montreal Protocol: ODCs listed in the Montreal Protocol are not used in the manufacture of or formulation of this product.

Genetically Modified Organisms (GMO)
Additives derived from Genetically Modified Organisms (GMO's) are not intentionally used in the formulation of this product.

Tallow
Tallow derived additives are not used in the manufacture of this product.

Kosher
We do not certify our resins to be Kosher or in compliance with Kosher requirements.

Halal
The product is not Halal certified.

European Pharmacopeia (EP)
This product has not been tested for E.P.

Drug Master File (DMF)
Information on this product is not listed in a DMF.

US Pharmacopeia (USP)
This product has not been tested for USP Class VI.

Latex
"Natural rubber latex", "dry natural rubber", "synthetic latex" or "rubber that contains natural rubber" is not used in the manufacture, formulation, handling and packaging processes of this product.

Polycyclic Aromatic Hydrocarbons (PAHs)
We do not intentionally use the following polycyclic aromatic hydrocarbons (PAHs) in the manufacture of or formulation

of this product.

Composting - CEN Standard EN 13432
The product is not suitable for composting.

Energy Recovery - CEN Standard EN 13431
The calorific gain from polypropylene in an energy recovery process is 24 MJ/kg.

MOSH, MOAH & POSH
- POSH : Polyolefin Oligomeric Saturated Hydrocarbons
- MOSH: Mineral Oil Saturated Hydrocarbons
- MOAH: Mineral Oils Aromatic Hydrocarbons

Mineral oil saturated hydrocarbons (MOSH) are paraffins and naphthenes. Mineral oil aromatic hydrocarbons (MOAH) are highly alkylated mono- and/or polyaromatic hydrocarbons from mineral oil.

This product does not fall under MOSH, MOAH or POSH hydrocarbons.

Bovine Spongiform Encephalopathy (BSE)/Transmissible Spongiform Encephalopathy (TSE)/"Mad Cow"
- Tallow derived materials used in this product are in compliance to the requirements of the regulations 1223/2009/EC, 1069/2009/EC and 142/2011/EC.
- The tallow derived raw materials used in these products fulfill the requirements laid down in the Note for Guidance, EMA/410/01, rev.3, part 6.4 (Tallow Derivatives) and EC Regulation 999/2001.

Inventories
All ingredients in the product are in compliance with the following chemical inventories:

United States:	Toxic Substances Control Act Inventory (TSCA)
Canada:	Domestic Substances List (DSL) – Non-Domestic Substances List (NSDL)
Europe:	European Inventory of Existing Commercial Chemical Substances (EINECS) European List of Notified Chemical Substances (ELINCS)
Australia:	Australian Inventory of Chemical Substances (AICS)
Korea:	Korean Existing Chemicals List (ECL)
Japan:	Japanese Existing and New Chemical Substances (ENCS) The product is also in Compliance with Food Contact Positive Lists by Japan's Ministry of Health, Labour and Welfare (MHLW) issued on April 28th, 2020 and effective on June 1st, 2020. Table 1 and 2.
The Philippines:	Philippines Inventory of Chemicals and Chemical Substances (PICCS)
China:	Inventory of Existing Chemical Substances Manufactured or Imported in China IECSC)
New Zealand:	New Zealand Inventory of Chemicals (NZIoC)
Taiwan:	Toxic Chemical Substance Control Act (TCSCA)

The product has no special requirements under US TSCA (e.g. consent orders, test rules, 12 (b) requirements, etc.).

Other chemicals (NIAS):
The chemical substances listed below are not used intentionally in the manufacture or the formulation of this product and are not expected to be present. Since these products are not expected to be present, we do not carry out analysis in determining these substances.

Endocrine Disrupters:	As reported in the ED List
	As reported in the ANSES

Food Allergens

European Union

The food ingredients listed in the Annex II of European Directive 1169/2011/EC, are not used in the manufacture, or the formulation of this product and the product is manufactured in dedicated equipments. However, this product has not been tested for these substances.

United States

Major food allergens (crustacean shellfish, eggs, fish, milk, peanuts, soy, tree nuts, and wheat) as specified in the Food Allergen Labeling and Consumer Protection Act (FALCPA) of 2004 are not used in the manufacture, or the formulation of this product and the product is manufactured in dedicated equipments. However, this product has not been tested for these substances

Endocrine Disruptors

Biocides

The active substances listed in the Annex I of the biocidal products regulation, EU 528/2012, are not used in the manufacture of or formulation of this product. However, this product has not been tested for these chemical substances.

Bisphenol A (BPA) and other bisphenols and bisphenol derivatives – Regulation (EU) 2024/3190

This product complies with regulation (EU) 2024/3190 of 19 December 2024 concerning the use of Bisphenol A (BPA) and other bisphenols and bisphenol derivatives, as the manufacturing of polypropylene, and polyolefins in general, do not require their use

Phthalates

Plasticizers are not used polypropylene as Polyolefins do not require the use of plasticizers to make them soft and flexible. Those phthalate plasticizers that have been associated with potential health issues are not intentionally used by Advanced in the manufacture of or formulation of this product. However, traces of phthalates may be present in this product as impurities from the catalyst system (as minor component of catalyst system, defined as Technical Support Agent), which are in compliance with Regulation (EU) 10/2011/EC.

Cosmetic regulation 1223/2009/EC

The EU regulation 1223/2009/EC applies to cosmetic products and it does not apply to the polymer resins. However, we confirm that any of the substances listed in the Annex II of the regulation 1223/2009/EC is not used in the manufacture or formulation of this product. However, this product has not been tested for these chemical substances.

Global Automotive Declarable Substance List (GADSL)

The monomer, the base resin and the additives used in the formulation of this product are not listed in the aforementioned Global Automotive Declarable Substance List. The phthalate plasticizers that have been listed in the GADSL are not intentionally used in the manufacture or formulation of these grades.

Dimethyl Fumarate (DMF) – EU Commission Regulation 412/2012

Dimethyl fumarate [2-butenedioic acid (2E)-, dimethyl ester] (DMF) (CAS#: 624-49-7) is not used in the manufacture of or formulation of these product. However, we do not test this product for DMF.

Triclosan (2,4,4'-trichloro-2'-hydroxydiphenyl ether) – Commission Decision of 19 March 2010-(2010/169/EU)
Triclosan (2,4,4'-trichloro-2'-hydroxydiphenyl ether) Cas. N.3380-34-5 is not used in the manufacture of or formulation of this product. However, this product has not been tested for these substances.

Conflict Minerals (Dodd-Fran Wall Street Reform and Consumer Protection)
Conflict minerals, which include columbite-tantalite (also known as coltan) [source for tantalum], cassiterite [source for tin], gold, wolframite [source for tungsten] or their derivatives are not intentionally used in the manufacture of or formulation of this product. However, we do not test this product for these substances.

EPA
This product does not contain any substances listed under the Toxic Substances Control Act (TSCA) Inventory Reporting (Section 8(b)), and is in compliance with the latest Chemical Data Reporting (CDR) requirements, including the most recent updates with the CDR submission deadline of November 22, 2024

Switzerland "VOC-LENKUNGSABGABE"
This product contains less than 3% VOCs of the substances in the positive lists of the above Regulations.

Rhode Island Air Toxics
To the best of our knowledge, the chemicals in the list of Rhode Island Air Toxics mentioned as HAP are not used in the manufacturing or formulation of this product. However, this product has not been tested for these chemical substances.

Global Toys Regulations
CEN EN Standards, EU Directive 2005/84/EC and ASTM F963 refer to safety of toys and not specifically to plastic raw materials. According to the information provided by our raw material suppliers, we deem this product should comply with the requirements of ASTM F963, CEN standards EN71-3 / EN71-9 and EU Directive 2005/84/EC, as applicable to plastic raw materials (pellets, powder, flakes). However, this product has not been tested according to these Standards.
